

RHENIUM AND TECHNETIUM COMPLEXES
CONTAINING A HYPOXIA-LOCALIZING MOIETY

Abstract of the Disclosure

5

Novel methods, processes and metal complexes attached to a hypoxia-localizing moiety comprising a metal, preferably radionuclide of rhenium or technetium;

10

a hypoxia-localizing moiety; and,
a complexing ligand, wherein said ligand and said radionuclide combined have cell membrane permeabilities greater than that of sucrose, are disclosed.
